## REMEDIAL TECHNICIANS COURSE

*"100% Fully Qualified Workforce"*

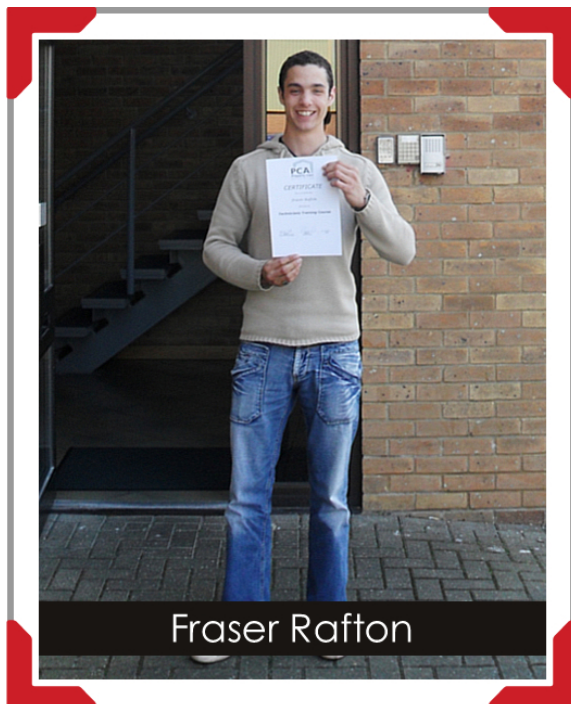

Our commitment to training shines on through our 100% fully qualified workforce. Dryfix Preservation Ltd are pleased to announce they have a 100% fully qualified workforce after both Fraser Rafton and Alan Rutter undertook and passed the Remedial Technicians course and examinations set by the PCA (Property Care Association) our leading industry body.

Both Fraser and Alan are experienced technicians and have worked for Dryfix for almost two years now. During this period they have had continual onsite training, followed by in-house training days in both remedial treatment and specialist structural work. Their training with Dryfix most certainly stood them in good preparation for the PCA examinations which was aimed at fine tuning their knowledge and understanding of remedial repair and providing them with the professional qualifications.

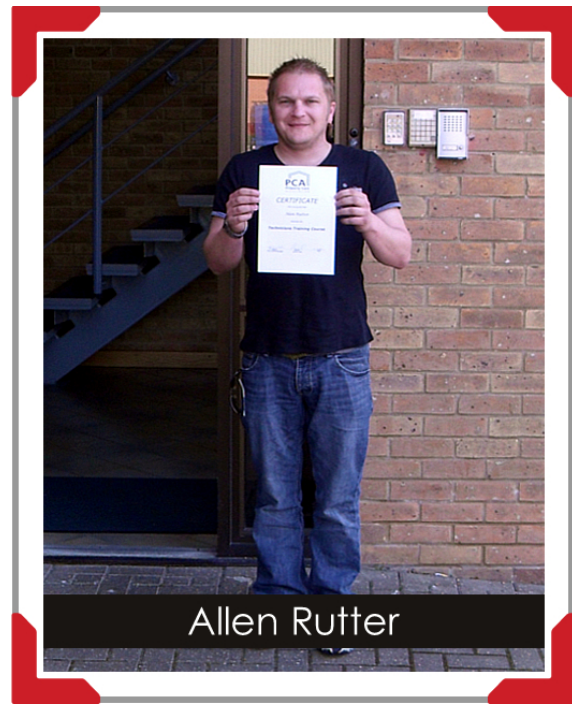

Achieving industry recognition as PCA Qualified Technicians proves that our workforce have been independently examined and tested proving their level of expertise. Dryfix Preservation can be trusted to provide peace of mind, through report inspections and work completed by skilled and experienced operatives

Congratulations go to both Fraser and Alan

Well Done!

Fraser Rafton

Alan Rutter
